

Navman M-Nav 650

Clear communication & guidance right to your customer's doorstep.

Just Accept and Go!!

The M-Nav 650 combines messaging and navigation into a reliable, easy to-use package and is fully integrated with the Navman in-vehicle tracking system.

With the M-Nav, you can send job details and customer information directly to the driver. You can also send job locations seamlessly to the driver as a trip destination, so when a driver accepts the job, the M-Nav automatically plots the best route to the job and guides the driver, turn-by-turn, to the destination.

KEY BENEFITS:

- Eliminate message errors and misunderstandings
- Communicate all necessary information in one simple operation from the PC
- Reduce fuel costs as no more back-tracking or driving across town to the wrong address
- Save time as no more mix-ups or delays getting the customer. If the driver misses a turn, the M-Nav will automatically recalculate the new route in a matter of seconds
- Increase productivity as the driver doesn't have to stop to write down a jobs details or read a map

KEY FEATURES of the M-Nav 650:

- Pop-up alert displays to notify when a new message is received
- Can send pre-programmed or free format messages to the OnlineAVL
- Automatically calculates distance to destination, speed and estimated time of arrival
- Use as an independent navigation device from the vehicle, or be routed from the office
- Preloaded with US road map
- Records unique PIN for individual driver-activity logging and reporting
- High sound quality speaker so you can clearly hear turn-by-turn voice guidance
- Easy connection and setup with solid magnesium alloy casing
- Super-bright 3.8" automotive quality colour TFT display screen offers clear viewing in all light conditions
